Professional Summary

Entry-level software developer with a Programming Certification and a strong foundation in Java and Object-Oriented Programming. Eager to apply programming and problem-solving skills in a professional environment while continuing to grow as a software developer and contribute to a collaborative development team.

Education

Programmer Certification | *June 2024 - February 2025*

- **ABCO Technology** | *Los Angeles, CA*
  - **Relevant Coursework**: Programming Fundamentals, Data Structures and Algorithms, Object Oriented Programming, Database Management, Web development, Mobile applications development, Software Engineering, and Capstone Projects.
  - **Grade**: 4.0 GPA

High School Diploma | *June 2019*

- **Simi Valley High School** | *Simi Valley, CA*

Technical Skills

- **Programming Languages:** Java, Python, Typescript/Javascript, Swift
- **Database**: SQL (PostgreSQL and MySQL) ; NoSQL (MongoDB and CassandraDB)
- **Frameworks & Libraries**: Spring Framework, Angular, Java FX, Java Swing
- **Tools**: Git, Docker
- **Other:** HTML & CSS, YAML, Cloudinary

Personal Projects

Time Frame: *Full-Stack Social Media Application*

Typescript, Java, Spring Framework, PostgreSQL, Cloudinary, HTML & CSS

- Developed social media features supporting text and image posts, likes, comments, and user-following functionality.
- Designed the PostgreSQL schema and implemented database operations using JDBC; built Spring Boot API endpoints connecting TypeScript to backend services.
- Implemented session-based authentication, CSRF protection, and BCrypt password hashing with Spring Security; integrated Cloudinary for image storage.

AllStaff: *Full-Stack Employee Management System Application*

Javascript, Java, Spring Framework, PostgreSQL, HTML & CSS

- Developed employee scheduling and time-tracking functionality with scheduled-based clock-in/clock-out restrictions and weekly payroll calculations based on hours worked and hourly pay rates.
- Implemented server-side rendering with Spring Boot and Thymelead to support employee creation, temporary deactivation, and updates to employee information, including job positions and hourly rates.
- Built a database-backed time simulation system using PostgreSQL as the authoritative time source, supporting simulated time progression at 4x and 8x speeds.
- Secured administrative access using Spring Security and encoded password using BCrypt.

School Projects

Database Ticketing System: *Academic Capstone || Java, MySQL, Gradle*

- Developed Java-based database operations to create, retrieve, update, and delete ticketing system records in a MySQL database.
- Used Gradle to manage project builds and dependencies, supporting the development and organization of the Java application.

Recipe Management System: *Academic Capstone ||Java, MySQL, Maven*

- Developed a console-based recipe management application implementing CRUD operations to create, retrieve, update, and delete recipe records in a MySQL database.
- Configured Maven to manage project dependencies and support the Java application's build process.

Work Experience

Retail Sales Coordinator at TJMaxx - *Santa Clarita, CA (July 2024- Present)*

- Coordinate daily sales floor operations while supporting associates in maintaining store standards and operational efficiency.
- Communicate with team members and management to address operational needs and ensure effective workflow.
- Assist customers, resolve concerns, and maintain a positive customer experience in a fast-paced retail environment.
